

## G.T NORDICS AS QUALITY AND HSE POLICY

---

GT Nordics has implemented a Quality, Environment, Health, and Safety Management System to ensure continuous improvement within its area of activity, which is defined as:

**“Design, manufacture and production of switchboards.”**

Our company specializes in the design, manufacture, and production of datacenter switchboards, with a commitment to providing high-quality, customizable switchboards. Our aim is to provide good sustainable solutions and customer interaction, which makes us a serious player in this market.

G.T. Nordics' provide high-quality and innovative switchboard solutions that meet the needs of our customers and future markets.

We are committed to delivering reliable and safe switchboards that enhance efficiency, promote sustainability, and exceed customer expectations. Through our expertise, exceptional customer service, and continuous innovation, we strive to be a trusted partner in the electrical industry.

Our focus and commitment are on:

- We carry out our assignment accordance with the customer's requirements and conditions.
- We must follow laws, environmental act, regulations, and ethical guidelines, including prevention of pollution.
- We must meet requirements in production standards that are covered by our work.
- We must learn from our mistakes.
- Our employees are our most important resource, so we are focusing on the HSE to have zero work related injuries.

We shall achieve this by continuous improvement of all processes and systems that have been established.

GT Nordics implement this policy reliably and consistently through the application of policies, standards, operating procedures, processes, and the definition of objectives, to control the provision of a high-quality service that meets all the requirements of the ISO 9001, ISO 14001, ISO 45001 standards and other good practices practiced by the market in which it operates.
